Apêndice A: curvas tensão x deformação sob compressão

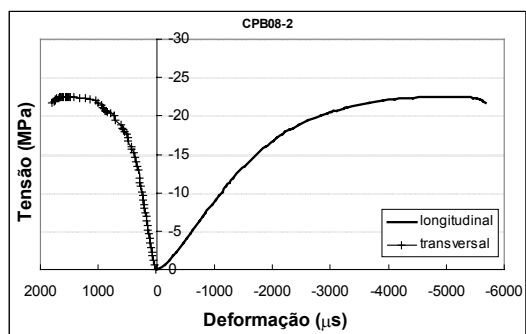

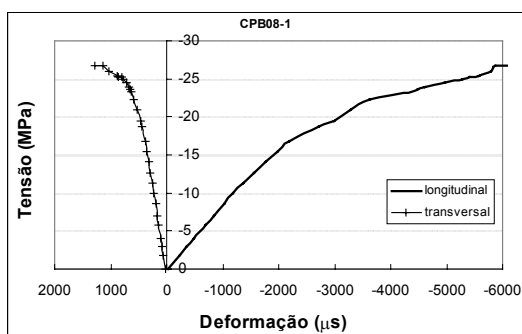

A.1

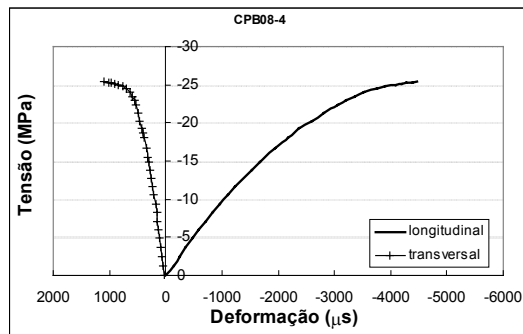

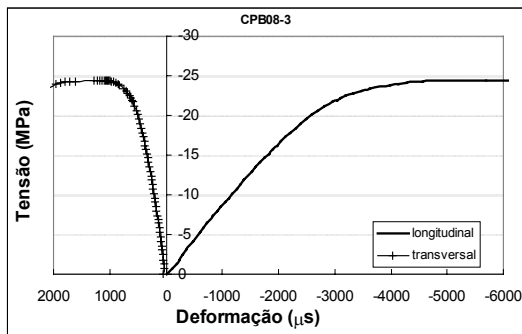

Matriz sem reforço (CPB00)

A.2

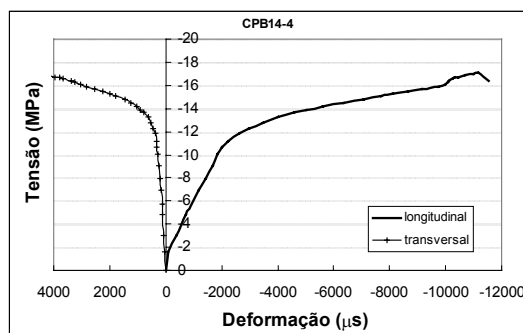

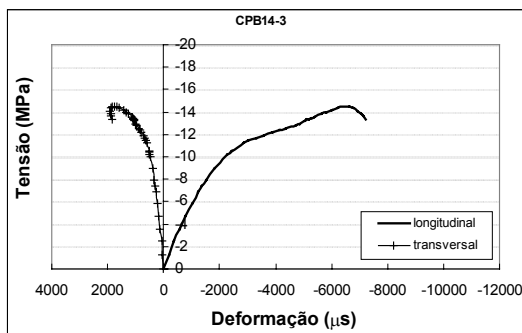

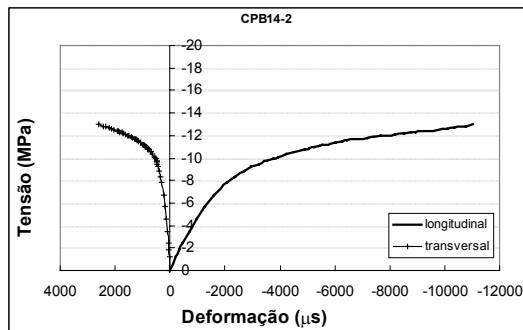

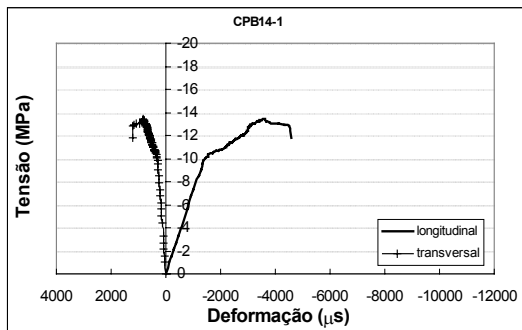

Compósito com 8% de polpa de bambu (CPB08)

A.3

Compósito com 14% de polpa de bambu (CPB14)

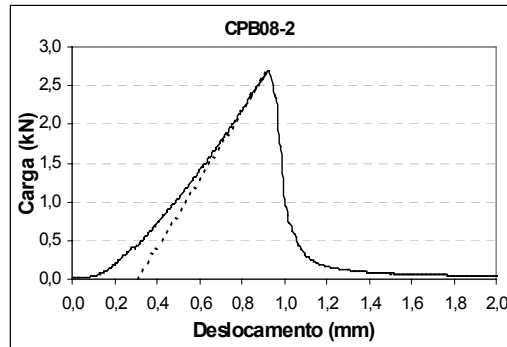

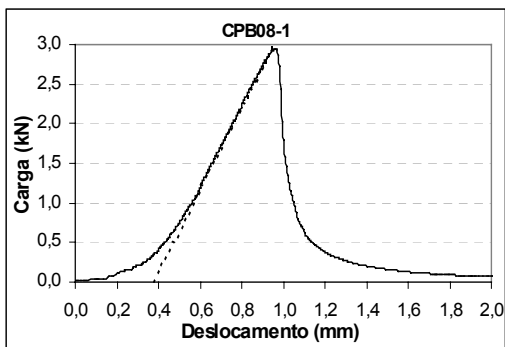

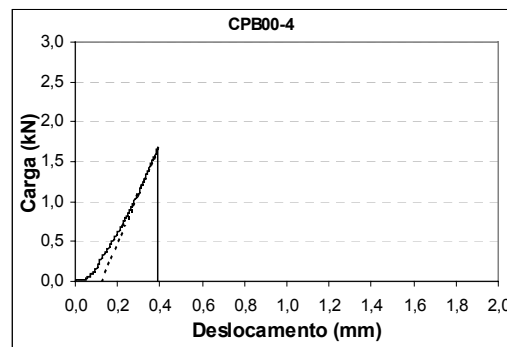

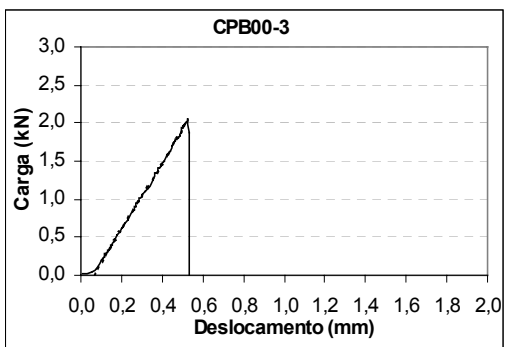

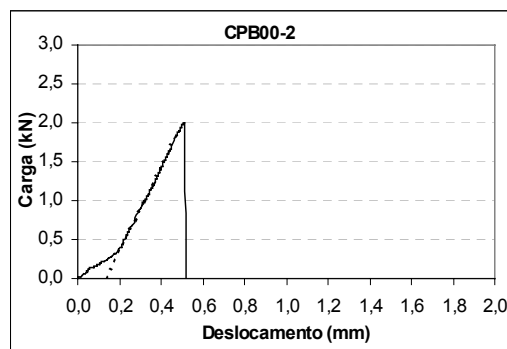

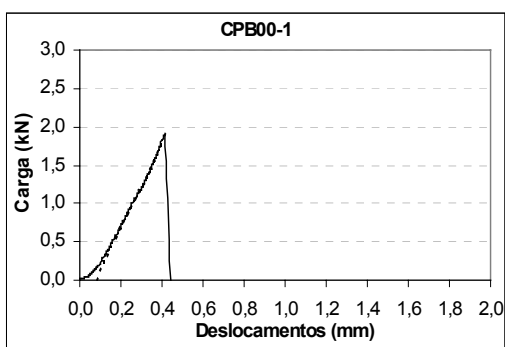

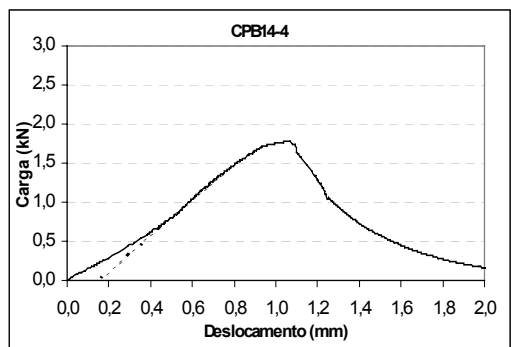

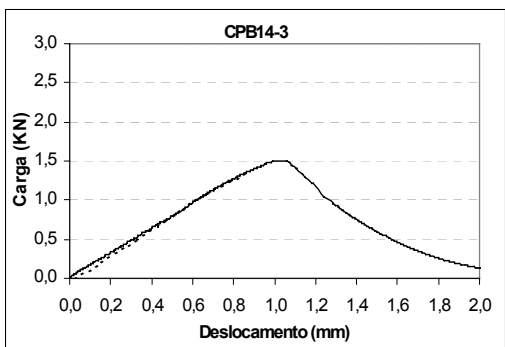

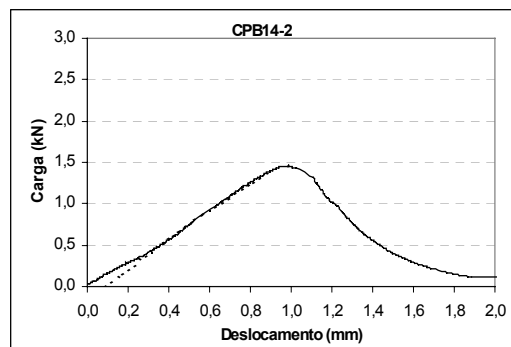

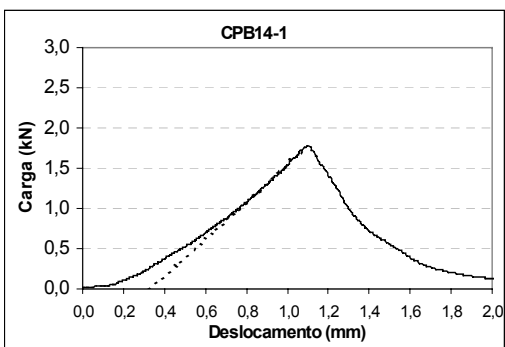

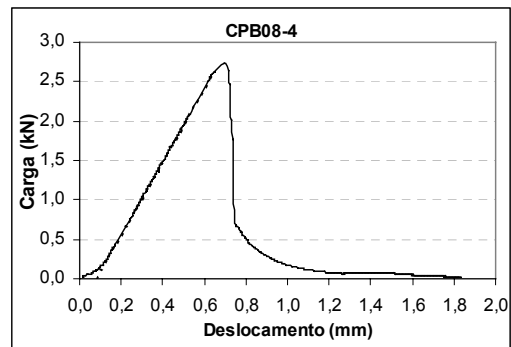

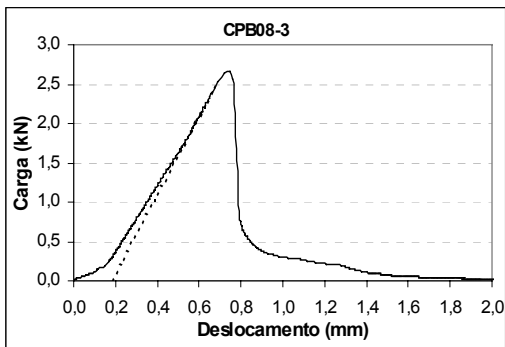

Apêndice B: Ensaio de flexão em quatro pontos de corpos-de-prova prismáticos de 25 mm x 50 mm x 200 mm

B.1

Corpos-de-prova sem entalhe

Curvas carga-deslocamento dos corpos-de-prova prismáticos sem entalhe, submetidos à flexão em quatro pontos, com correção dos valores espúrios de deslocamentos.

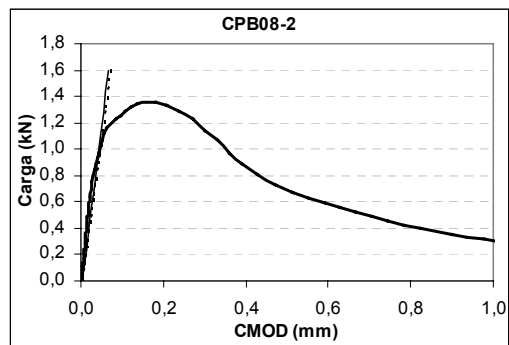

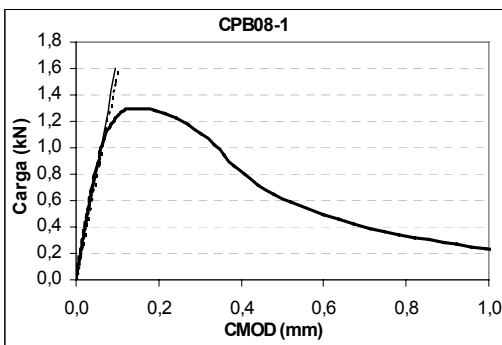

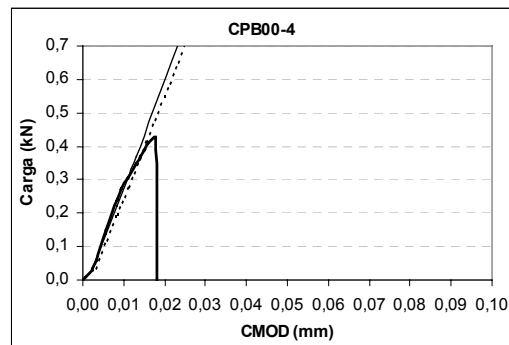

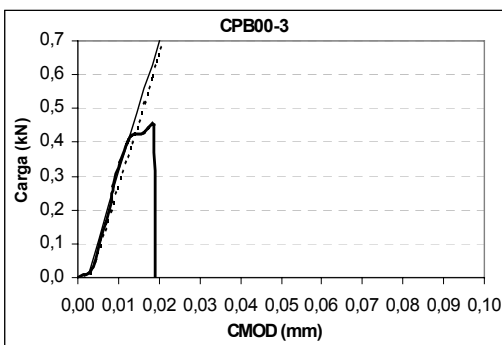

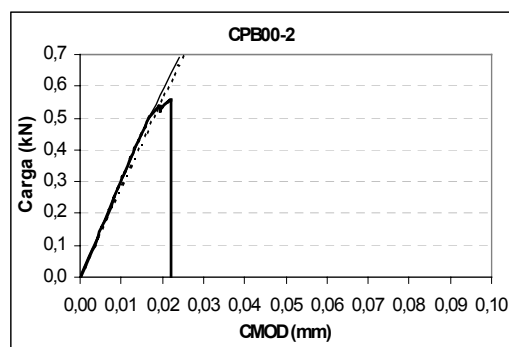

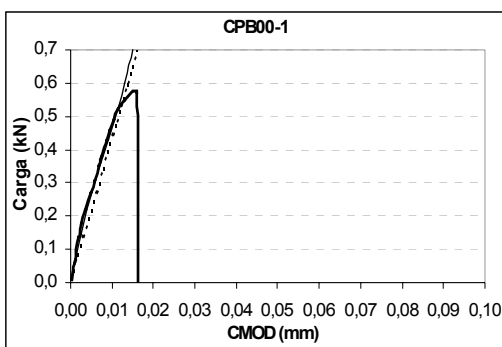

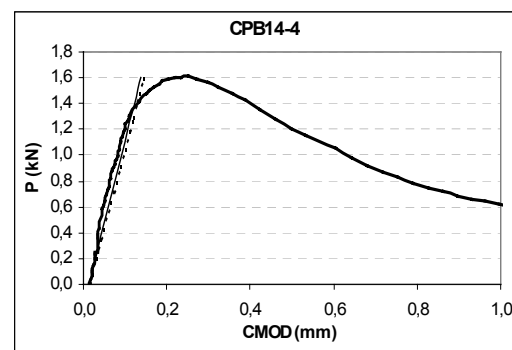

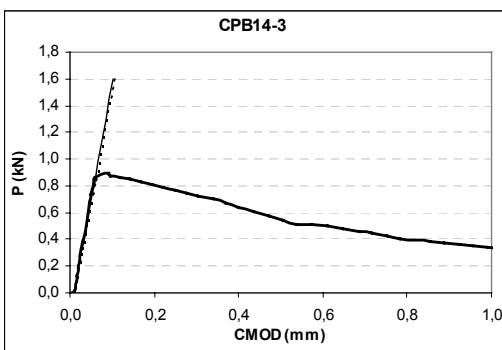

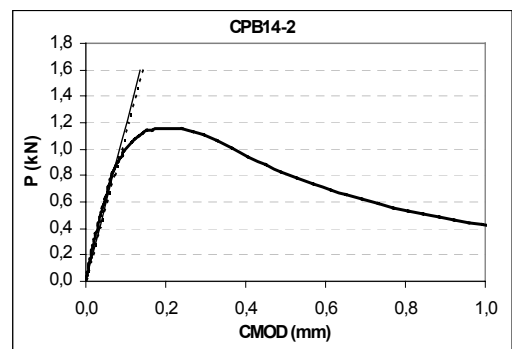

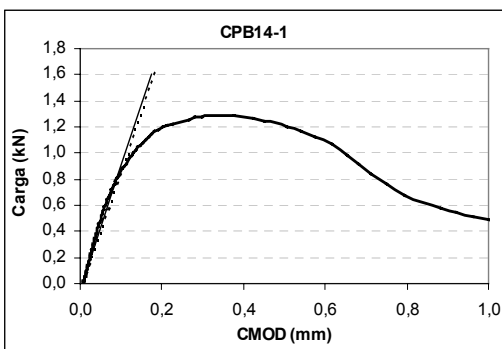

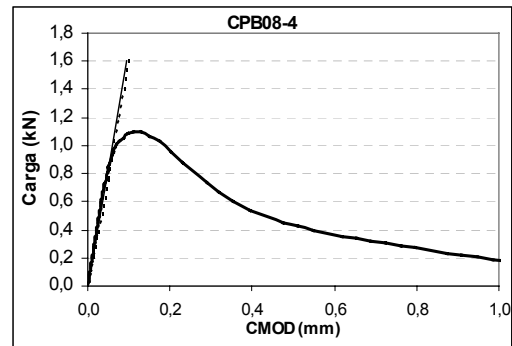

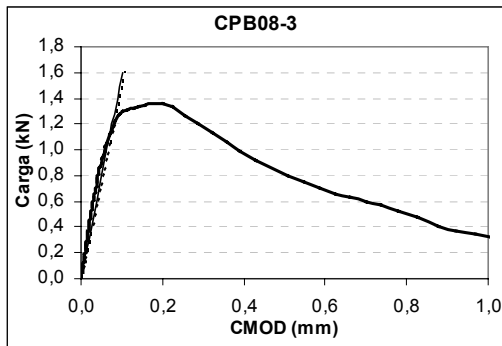

B.2

Corpos-de-prova com entalhe

Curvas carga-CMOD de corpos-de-prova prismáticos com entalhe, submetidos à flexão em quatro pontos, com aplicação do método da ASTM para localização do ponto de início do crescimento da trinca.

Apêndice C: Curvas de resistência dos corpos-de-prova prismáticos com entalhe, submetidos à flexão em quatro pontos

Para possibilitar a observação das curvas, os gráficos relativos à mistura de referência têm escala no eixo das abscissas aumentada em relação aos demais.
